Poulima Biswas

REACT Fullstack Developer

biswaspoulima36@gmail.com

+91 8939326005

React fullstack developer in Verizon with 8.5+ years of relevant industry experience. Primarily working in the **Agile** environment. Building Single-Page web applications with **React**, **Redux**, **Styled Components**, **NodeJS**, **Express**, and **MongoDB** while using **Docker**, **Kubernetes**, and **AWS** for code deployment. B.Tech in Computer Science and Engineering from West Bengal University of Technology in 2015.

Key Skills

React, Redux, Javascript, ES6, NodeJs, Express, MongoDB, Styled Component, Webpack, Eslint, Vite, Docker, Jenkins, AWS, Kubernetes

Work Experience

Verizon - Dec-2018 - Present
React Developer | MERN Stack Developer

TATA CONSULTANCY SERVICES - Sep 2015 - Nov 2018
Front End Developer

Projects

VDS

Verizon Design System is the single source of truth for Verizon's digital experience. It is a collection of reusable components and standards that can be assembled together to build any number of applications.

Technologies: React, Typescript, Styled Component, Lerna, Storybook, Jest, Rollup, Nodejs, MongoDB, Jenkins, Docker, AWS and Kubernetes

Responsibilities:

- Convert reusable design components into reusable code components and maintain the performance, accessibility, and responsiveness to ensure that the design is implemented correctly in different contexts.
- Participate in code reviews to ensure adherence to design guidelines and code quality

- Regularly audit the design system to remove redundancy and improve load times.

WSR

A report management tool which gives users a new experience in logging day to day tasks and helps the management to seamlessly track the efforts and productivity of resources, further improving business.

Technologies: React, Redux, Redux Saga, NodeJs, Express, MongoDB and AWS

Responsibilities:

- Work closely with UI/UX designers to create responsive and visually appealing user interfaces
- Design and implement RESTful APIs for seamless integration between front-end and back-end systems
- Implement unit testing to ensure that each unit of the software performs as intended and meets requirements
- Troubleshoot, debug, and optimize code to ensure high performance, and reliability

FrescoVibe

FrescoVibe is a blogging app like Medium powered by React/Redux. We have used Workbox for service workers and lighthouse for performance measurement.

Technologies: React, Redux, Redux Saga, SASS, Webpack, Bebel

Responsibilities:

- Write well-structured code that is easy to maintain and understand
- Optimize code for performance, ensuring fast loading times and smooth user experience
- Ensure that the application is responsive and works consistently across different web browsers and devices

Education

B.Tech - **Computer Science Engineering (2011-2015)**
West Bengal University of Technology

Achievements

✓ Won spotlight award several times.

I hereby declare that the above written particulars are true to the best of my knowledge and belief.
